Decker & Co. Hosts Paul Schulte, Asia Fintech Expert, for U.S. Roadshow

San Francisco, CA, September 12, 2016 – Institutional equities broker Decker & Co. is pleased to welcome Paul Schulte, founder of Schulte Research, to the U.S. for a series of meetings with asset managers from September 16-24.

Schulte has 27 years of experience in equity research and strategy in Asian and emerging markets, including both buy and sell sides. Schulte is active in academia as a lecturer in both Hong Kong and in the U.S. He served as an Economic Policy Advisor to Bank Indonesia and as an Analyst with the National Security Council, White House in the U.S. during his early career.

During this roadshow, Schulte will share new research on IoT, which he describes as a new industrial revolution that connects the physical world to the financial world through sensors and cellphone data. Schulte will also provide an Asian perspective on the emerging trend of insurance technology, where many start-ups are challenging legacy management by offering custom-made products through analytics at a fraction of the price.

“We are honored to host one of the leading voices on Asia Fintech,” said Mark Decker, founder and CEO of Decker & Co. “Paul’s research provides critical insights into these fast-emerging, disruptive themes.”
